JOB POSTING

Interested candidates should send their resume via regular mail, email (*as a Word document*) or facsimile to the address or phone number shown above. The Office of the Attorney General is an Equal Opportunity Employer.

Application Developer Information Technology section

Duties:

Primarily, this position will participate in the development, support and enhancement of PHP applications and the corresponding MySQL backend databases. The candidate is required to demonstrate that he/she has mastered object oriented concepts, be familiar in writing optimized SQL for MySQL, has experience with enterprise development frameworks and practices such as Unit Testing and has overall skills to develop and maintain high traffic environments. The candidate needs to be self-motivated and be able to plan and execute based on imposed deadlines.

- Active member of Business Solution team and technical lead for programming development projects by analyzing, designing and implementing in-house applications or researching and implementing third party solutions to automate business processes.
- Conduct thorough functional research, fact-finding and analysis of user needs required to develop and maintain information systems. Ability to collaborate with business team and other non-technical members of the organization.
- Proactively seek and implement solutions that will reduce the cost and time associated with the business operation.
- Provide complete documentation for new or modified systems
- Provide assistance with database administration tasks such as design, implementation, security, queries/reports and maintenance of MySQL.
- Tier 2 help desk support for escalated tickets regarding in-house applications/databases and analyze trends in errors so as to identify and deploy long term solutions to problems.
- Assist in developing training materials and conduct training classes on the applications developed and supported.
- Assist with or lead special projects as required and perform other duties as assigned.
- Ability to effectively communicate technical concepts to other technical staff members.
- Must be available outside of conventional business hours, as needed.

Requirements:

- * Bachelors of Computer Science degree preferred with 0-3 years experience.
- * Required programming/scripting languages: PHP, HTML, JavaScript
- * Desired programming/scripting languages: C#, .NET, Java, APEX
- * Required experience managing MySQL and MS SQL DBMS.
- * Experience with FTP, SFTP, and PGP encryption

Salary commensurate with experience.
